Theatre Seats	Daily	ASAP	6-12 months
Passenger Seats, Buses, Planes etc	2-3 days	ASAP	6-12 months

NOTES:

- Oils from sweat, cooking and other airborne oily contamination are the main contributions to soil build up. The soiling rates will vary according to the amount of body contact time, temperature, and general pollution levels.
- Suggested frequencies based on normal or average usage.
- Some sections of furniture will soil quicker than others and will require greater attention.
